

## Tetromino Puzzles

A tetromino is a polyomino made from 4 squares. There are 5 different tetrominoes. Can you find them?

Color the 5 tetrominoes on the last page of this worksheet. Then cut them out. Which of the shapes below can you make using the 5 tetrominoes? (Hint: three of them are impossible.)

Tower

Turtle

Submarine

Rectangle

Building

Bridge

Wrench

Stairs

Castle

Color each of the puzzle shapes with a checkerboard pattern and count the number of black and white squares in each.

Tower
